

10-8 Video

Procurement & Risk Mitigation Summary

10-8 Video provides mission-critical in-car video, body-worn cameras, and digital evidence management (DEM) solutions. Our systems are engineered for law enforcement and first responders, prioritizing evidence integrity, operational uptime, and long-term fiscal stability.

Core Strategic Pillars

- **Legal Defensibility:** Evidence-Centric Design: Workflows are engineered to support subpoena response, discovery, and formal legal review.
- **Operational Reliability:** Unified Ecosystem: Hardware and software are developed as a single system to reduce common failure points and sync errors.
- **Fiscal Responsibility:** No Recurring Fees: Systems are sold without licensing or recurring subscription costs, supporting predictable long-term budgeting.

Risk Mitigation & Compliance

1. Evidence Integrity & Chain of Custody

10-8 systems are designed to minimize the risk of human error, a leading cause of lost or inadmissible evidence.

Feature	Description
Granular Audit Logging	Comprehensive tracking of evidence handling actions from capture through retention and deletion.
Controlled Access	Role-based permissions to secure sensitive data and maintain chain of custody.
Discovery-Ready Workflows	Administrative tools optimized for public records requests and court deadlines.

2. Operational Reliability & Simplicity

System complexity increases training burden and user error. 10-8 prioritizes intuitive operation to support agency compliance.

Feature	Description
Reduced Training Burden	Straightforward interfaces for officers, supervisors, and administrators.
High-Duty Cycle Engineering	Designed for continuous operation in 24/7 patrol environments and extreme temperatures.
System Visibility	Administrative insight into system status and potential issues affecting field operations.

3. Infrastructure & Deployment Flexibility

10-8 systems are designed around practical, cost-effective deployment for small to mid-sized agencies.

Feature	Description
On-Site Storage Architecture	Agency-owned, on-premise storage provides full control of evidence and avoids ongoing cloud or hosting fees.
Scalable by Department Size	Designed to support agencies ranging from a single officer to several hundred officers without unnecessary system complexity.
Unified Evidence Platform	In-car and body-worn systems function together within a single evidence workflow.

4. Long-Term Value Focus

10-8 emphasizes durability, agency ownership, and transparent pricing to support multi-year fiscal planning.

Feature	Description
Extended Hardware Lifecycles	Ruggedized components selected for long-term serviceability and continued use.
Predictable Budgeting	One-time system costs with no licensing, subscription, or recurring software fees.

Summary for Decision Makers

10-8 Video serves as a risk-management partner for small to mid-sized law enforcement agencies. Agencies are supported by reliable recording, defensible evidence handling practices, and agency-owned systems designed to reduce operational, legal, and financial risk over time.

Design Philosophy: Designed for court use. Engineered for reliability.
